Profile

I am a dedicated BCA graduate with 2 years of experience in Flutter development, gained while working as a Junior Flutter Developer at Ralfiz Technologies during my degree. This part-time role allowed me to develop strong technical skills and a deep understanding of mobile application development. Currently, I am further expanding my skill set as a MERN stack intern at Luminar Technolab, where I am exploring full-stack development. I am passionate about learning and eager to contribute to innovative projects in the tech industry.

Projects

Epicene
Epicene is an innovative Android web application designed to enhance communication between transgender individuals and the broader community. The platform aims to bridge the gap and foster meaningful interactions, providing a safe and inclusive space for users. My role in this project involved developing and optimizing the application to ensure seamless user experience, focusing on creating a responsive and accessible interface that meets the needs of its diverse user base.
